

EQUIPMART RESOURCES TESTIMONIALS

Equipmart Resources the distributor for Mustang Skid Steer Loader had been using FUS-ON TECHNOLOGY Engine Treatment since 2011. Every unit of the brand new machine that they delivered to their customers, the engine, transmission, hydraulic tank and radiator are treated with FUS-ON TECHNOLOGY's products.

Mr. Ernie Lim, the MD of **Equipmart Resources** said that on a couple of incident, the treatment save his company from having to replace new engines due to engine oil leaking out completely and the operator continues using the machine.
